My Anthropology

Spearheaded ethnographic research for the SPCA of Texas

--

Goal: Identify state of access to veterinary services in southern Dallas, consider its relation to ongoing stray dog issue + social inequalities

--

Method: Ethnography

Their Knowledge

Everyday barriers that limit access

--

Coping with stray dogs, rescuing, and compounding stressors

Our Results

Pragmatic deliverables via client report

--

Theoretical development

--

Publishable research

--

Consolidated assessment of local issue, necessary to substantiate policy + non-profit program development

EDUCATION

STRAY DOGS

QUANTITATIVE

ANTHROPOLOGY + ANIMALS + COMMUNITY

"So rarely do researchers directly come to us and say "hey, tell us about your neighborhood, tell us about your needs." People just make assumptions and make reports about [us] and they don't really talk to the people."
