ANTH 4701.004 – Urban Anthropology (14046)

MoWeFri 1:00PM – 1:50PM BLB 005 Dr. A. Nelson

Urban Anthropology. 3 hours. As more of the world's population settles in cities, anthropologists have increasingly shifted their sites of study from rural to urban settings. Despite this new geographic focus, it remains debatable whether anthropological studies merely take place in urban settings or are of the city. Our goal in this class is to question how anthropological insights and methods might contribute

Fall 2017 Anthropology Course List & Descriptions 8/28/2017 – 12/15/2017

to our understandings of urban phenomena. In order to do so, we will ask the following big questions: (1) What is a

city? What sort of conditions produced this spatial category in different parts of the world throughout history? (2) How did the industrial revolution reshape the city and structure contemporary notions of spatial planning, social engineering and capitalist production? (3) What is the future of the city in the postmodern, post-industrial and post-national global era? Will future cities reduce or exacerbate social and economic inequality? (4) How have social and economic histories shaped the layout and structure of contemporary Denton and Dallas? Students will be asked to apply course material to their own ethnographic projects.

ANTH 4701.810 – Design Anthropology (16973)

Internet Course

Dr. S. Squires

Design Anthropology. 3 hours. In recent years, ethnography has become popular with designers of products and technologies as a way of learning about the experience of users. This research approach has been applied to such diverse problems as: How to design office environments that encourage group work and collaboration, How to design websites that fit the "mental model" and usage patterns of their target audiences, how to design museum exhibits that maximize the engagement between visitors and displays. "Design Anthropology" is a rapidly growing field of employment for those who wish to work in applied anthropology. In this course, students learn the fundamentals of the field. By collaborating on an applied project, they gain practice in applied research methods and video ethnography. They learn to engage in collaborating on an applied project, they gain practice with customers to translate their research into practical applications. In addition to the hands-on experience, students conduct readings on topics relevant to the project and to design anthropology in general.
