

# Using Anthropology to Make a Difference

Tracy Jungwirth, MA

*My Career Path: I chose a Masters in Applied Anthropology because I knew I wanted a career that makes a difference and has communtiy impact and could put research into practice.*

*I have used anthropology to inform many aspects of my work. My training has enabled me to do qualitative resarch and evaluation. It has also given me skills to work in the medical field and with the communtiy we serve.*

*Anthropology enables me to understand heath care dispartites and educate providers to help them eliminate them.*
