

Anthropology and Public Health: Its more than interviews and observations

Where I work: UTSouthwestern Medical Center in Dallas in the Department of Population and Data Sciences

My role: Research Associate in the Qualitative Research Core. My role is to be the Qualitative expert on projects

Where is the Anthropology in all of this?

What Anthropology looks like in practice

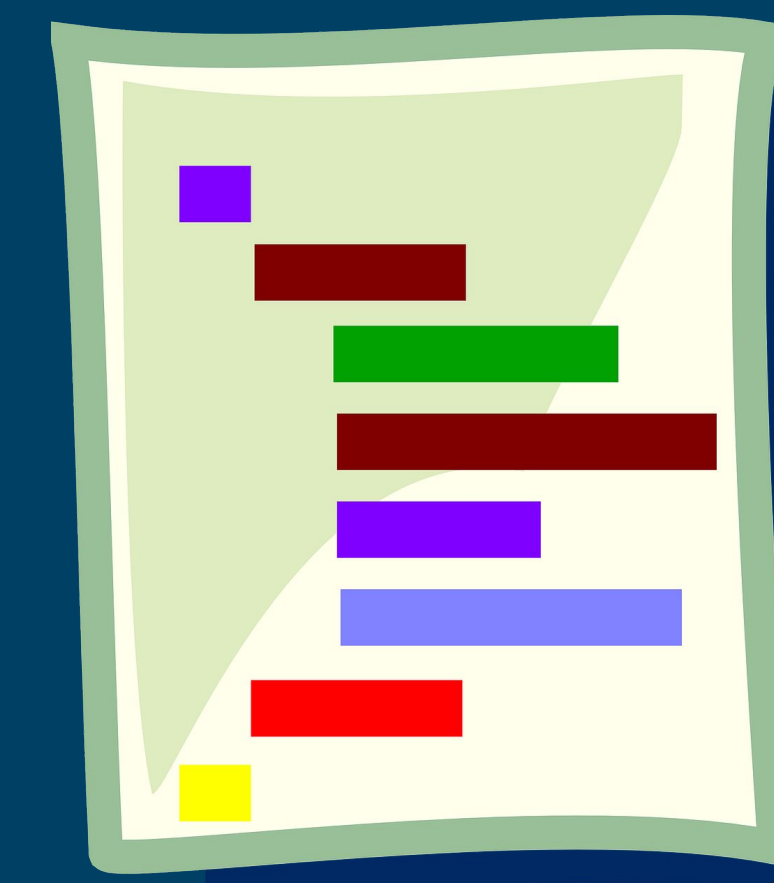

Engage stakeholders (PI/PC)

Generate data collection instrument

Begin data collection

Data Analysis

Papers, Manuscript

Anthropology that matters

- Assess the needs
- Asks tough questions
- Humanize participants
- Inform and implement
- Reflect and improve

ANTHRO SKILLS!

Data collection and data analysis, design and implementation of data collection instruments, Focus on the “audience”, comfort in communicating with people of various backgrounds, reflexive lens and a holistic approach and perspective
