

# HOW DO I ANTHRO?

MS in  
Applied Anthropology  
(Dec 2022)

- Exposed to *collaboration* with various disciplines
- Learned to *market my anthro skillset*
- Applicable and *real experiences!*  
(ask me about my cohort's research with the **Perot Museum**)

**UX Researcher**  
at  
**Red Hat**

- **Immersing** myself into the "open source" and "software geek" **subculture**
  - Continuously **building rapport** and learning tech lingo
- Plan and execute **generative and evaluative studies** on digital experiences using:
  - interviews, usability studies, observations (+ many more)
- **Humanize** the "user" in software industry

**An anthropological framework allows me to be *human oriented*, advocate for the *needs of ALL users*, and *keeps me curious*.**
