

# anthropology makes change accessible here & now

CAITLIN GRIFFITH, BA  
UNT SUSTAINABILITY  
PEROT MUSEUM OF NATURE & SCIENCE

I've used anthropology to create solutions with the "people factor" in mind *during & after* earning my bachelor's degree. The best decisions aren't always made because stakeholders & community members often aren't getting the whole story. As an anthropologist, I translate the perspectives of people & the effects of decision-makers in accessible, digestible ways to effect change.

One of my accomplishments is earning a grant that allows UNT to utilize renewable energy credits (RECs) to power 100% of campus electricity, making UNT the #1 university in Texas & #9 in the nation in green power usage.

INVESTIGATE

disconnection.

EVALUATE

potential.

COMMUNICATE

perspectives & solutions.

## What I Do:

- Evaluation: Exhibit & Program
- Advocacy: Grassroots & Research
- Community Outreach: Nonprofit
- Writing: Grant & Journalism

## What I've Learned:

- Get comfortable being uncomfortable.
- Understand the whole story.
- There are ALWAYS more than two options.
- Speak for the quietest voice.
- Ethics & lucrativeness ≠ mutually exclusive.
- Don't wait! Search for opportunities now!

## Marketable Skills:

- Qualitative research
- Cross-cultural communication
- Community engagement
- Program evaluation
- High adaptability
- Holistic perspective
- Empathy
